Useful Resources

Connor Sedwick, Behnam Saeedi, Collin Dorsett

✦

1   WEBSITES

Throughout the build cycle for this project many online resources were utilized to aid us. The following are sites we used as well as what information was gathered from them.

1.1   LaTeX

Some great resources for understanding LaTeX:

https://www.sharelatex.com/learn/
Provides a wealth of documentation on the LaTeXlanguage and syntax.

https://stackoverflow.com/questions/
Offers a great community of programmers who will answer your questions and may have answers to questions that others have posted previously that can aid in troubleshooting.

https://www.overleaf.com/
A great project software that supports multiple users to modify papers at the same time. Also does a great job to provide users with an up-to-date preview of their document as they work on it.

1.2   Python Syntax

Some great resources for understanding Python:

https://www.tutorialspoint.com/python/
Offers easy to understand tutorials and documentation on how to use Python

https://stackoverflow.com/questions/
Offers a great community of programmers who will answer your questions and may have answers to questions that others have posted previously that can aid in troubleshooting.

1.3   Kivy

https://kivy.org/docs/guide
Provides documentation on the Kivy API as well as tutorials to get started with it.

https://stackoverflow.com/questions/

Offers a great community of programmers who will answer your questions and may have answers to questions that others have posted previously that can aid in troubleshooting.
